# North Karelia in a nutshell

North Karelia has vast areas of forests, lakes and natural resources. The capital of the region is Joensuu with around 75 000 inhabitants and the number is growing due to an attractive offering in vocational and higher education. North Karelia shares 300 kilometers of common border with Russia and about 1.2 million people cross the border each year at the Niirala international border crossing point.

High-end wood, plastic, metal and stone products are region's leading industrial fields. The region is internationally well known for the high-level forest bioeconomy expertise and technology industries. International events, like Ilosaarirock Festival and Biathlon World Cup in Kontiolahti attract yearly tens of thousands of visitors. We are proud of our national landscape at Koli and the Bomba Karelian village. And no

matter the weather outside, families with children have fun in different spas, and indoor parks. The development of the transport connections keeps sparsely-populated North Karelia live.

North Karelia is a compact region and it is of adequate size. We have a very good cooperation and a development-oriented atmosphere, which gives us the possibility to create smart and practical solutions – to almost any problems. We have a Nordic style modern society, but also space to live and roam freely. Forests and lakes give us the quality of life.

Welcome to North Karelia!

Du Vais

Risto Poutiainen, Regional Mayor

# Folestly and wood

North Karelia is the only region in the world specializing in forest and wood industry in such a large scale. Our vast natural resources in wood are turned into pulp production, wood products, forest economy, logging and the manufacturing of equipment and machinery for forestry and forest bioeconomy applications. Joensuu is the Forest Capital of Europe and top research and education is centralized here.

#### WOODEN TELECOMMUNICATION TOWERS

EcoTelligent develops and manufactures wooden telecommunication towers and intelligent poles. Wood construction is combined with aesthetic design, providing more satisfying results for the community and people around the telecommunication towers and poles. Laminated timber of the towers also cuts down significantly the amount of CO2 released into the environment. EcoTelligent design is the next generation intelligent pole, serving the demands of the telecommunication improvements such as 5G.

## Plastic and metal

Due to North Karelia's strong background in subcontracting mobile phone industry, Joensuu region has very skilled companies and workforce in plastics molding and precision technology. Machinery and equipment manufacturing, and metal products have been an essential part of that development, since high quality tools in plastics or composite molding have been needed to produce precise and detailed plastic parts.

### HAVEL

#### PROTECTIVE HOSE GUARDS IN MACHINERY AND HYDRAULICS

HAVEL Spiral plastic hose guards protect hydraulic hoses and electrical wires in forestry, mining and agriculture machinery from external wear, friction and dents. The flexible and durable structure is the result of long-term development work in forestry machinery. Easy-to-install hose guards provide efficient protection against solvents and are resistant against severe temperature variations (-60 – +85°C).

# Mining and infla

North Karelia is geologically located in mineral-rich region and we have an extensive network of companies, education and research to support the industry development. The ores found in the region include tin, uranium, iron, copper, cobalt, and gold. In addition, soapstone, natural stone and talcum are found and mined in the area. Well-functioning logistics, earthmoving and contracting services enable future growth for the industry.

#### TAILORED VOCATIONAL EDUCATION AND TRAINING FOR MINING

Riveria Mining and Land Construction Institution has trained mining and land construction professionals already since mid-50's. The unique learning environment with latest technology and machinery can be tailored to shorter or longer educational needs. Riveria is a vocational institute with 8 fields of education and 6000 full-time students. Their high-quality adult education and training services in Mining and Land Construction are one-of-a-kind on European level.

# Tourism

North Karelia is a unique meeting point of eastern and western cultures and religions. There are about 2,000 lakes and two thirds of the area is covered by forest. North Karelia is a place where the Finnish national epic, the Kalevala, was created and it continues to be a source of inspiration of many. Koli National Park, the official Finnish National Landscape is one of the most famous attractions in Finland. You can, for example, go wild animal watching, take part in themed tours, enjoy your holiday in a cottage, visit national parks and Karelian Villages, try rafting in a traditional wooden boat, or even cross the border to explore Russian Karelia.
